Inspired by the solar system appears Elisa, a wall light that is minimalist and timeless.

Wall light with two asymmetric diffusing shades in translucent polymethylmethacrylate (PMMA) with satin-finish on both sides, thermoformed to 3 mm thick, with a third shade in stamped steel with a charcoal grey, burgundy or gold lacquer finish.

Stamped steel ceiling fixture base in white lacquer with an internal cylinder for housing the flexible LED strip to ensure the light is uniform across the whole surface area.
