Weightless light

As its name suggests, Emboss is a recessed ceiling light that enhances the space. The design of the base fixed to the ceiling stamped in lacquered steel ensures that the fastening screws remain hidden, giving it simplicity. The metallic ring that holds the opal glass diffusing

shade comes in three different finishes: lacquered matte white, lacquered matte black and finally a chrome gloss finish. The light that it projects is uniform and in turn generates a unique and subtle halo of light on the ceiling that makes it seem weightless.
