An interplay of angles
and movement

The inviting interplay between angles and movement make Nod an appealing lamp for contract spaces given its versatility. The weight and volume of each one of the hanging elements have a huge impact on the space, imbuing it with power. Its intelligent articulation allows

you to angle the hanging elements and illuminate the space directly or indirectly. There are three different versions of Nod with one, two or three hanging elements, which can be complemented dynamically in the same space to create a rhythm.
