

NAUU

bacchus *sideboard*

my story...

BACCHUS, the Roman God of wine, and the wooden barrels holding this delicious beverage, provide the inspiration for NAUU to create this sideboard, limited to 20 numbered pieces. Its avant-garde design is paired with quality materials, ensuring a truly unique character. We'll explain the story...

It begins with a visit to the Port wine cellars...

It was a rainy day and two of the brand's designers were visiting the city of Porto. In a pause between meetings, they decided to stroll through the town of Gaia, but it began to rain a lot as they walked by the entrance of one of the cellars. Well, they entered, and in that moment, was starting a guided tour. They joined the group, but soon after, the imagination began to float and the ideas to come... After the visit they ran to the hotel at full speed and began to draw the first sketches of what would be this fantastic sideboard.
