RECYCLED GLASS MOSAIC

Enameled glass

The product may be susceptible to scratching in handling and installation, as well as use. Expect variation of color run from production to production.

Installation

Only use adhesives with high adhesion and elasticity which are especially recommended for installing glass. Make sure to get complete coverage. All substrates should be properly reinforced to be sure there is no movement. For mortar installations, the mortar bed has to be cured (less than 2% humidity) and has to have proper reinforcing. Please refer to the TCNA HANDBOOK for more specific information regarding installation of glass tiles. Any type of cement based adhesive & grout is suitable.

Maintenance

Use a non-abrasive cloth and neutral detergents for cleaning. Avoid acid detergents, chemicals and solvents.

Usage

Enameled glass mosaic is recommended for interior walls, light duty floors, showers as well as for areas submerged in water.

How to cut glass mosaic

Glass mosaic must be cut using a diamond blade with water cooling process. The edges may be slightly blunted with sandpaper. In order to drill glass mosaic in total safety (even after the installation), it is necessary to comply with the general glass treatment recommendations.

Product inspection and claims

Being an artistic production, there may be a few minor defects or variations in intensity, composition, tone and brightness of the color. It is recommended to inspect all the material in the sunlight before the installation.
