GLAZED TERRACOTTA TILES

The product may be susceptible to scratching in handling and installation, as well as use. Expect variation of color run from production to production.

Installation

Only use white adhesives with high adhesion and elasticity which are especially recommended for installing terracotta. Any type of cement based adhesive & grout is suitable. Make sure to get complete coverage. All substrates should be properly reinforced to be sure there is no movement. For mortar installations, the mortar bed has to be cured (less than 2% humidity) and has to have proper reinforcing. Please refer to the TCNA HANDBOOK for more specific information regarding installation of terracotta tiles.

Maintenance

Use a non-abrasive cloth and neutral detergents for cleaning. Avoid acid detergents, chemicals and solvents.

Usage

Glazed terracotta tiles are recommended for interior walls, light duty floors and showers walls. The installation in showers requires the application of epoxy adhesive and grout. Do not use in shower floors and areas submerged in water.

Product inspection and claims

Being an artistic production, there may be a few minor defects or variations in intensity, composition, tone and brightness of the color. It is recommended to inspect all the material in the sunlight before the installation.
